

Business Exchange Services (BES)

Energy Industry

Background

- Business Exchange Service (BES) took delivery responsibilities of a new logo client called Smart DCC in October 2018.
- DCC (<https://www.smartdcc.co.uk/>) was established to deliver Smart Metering in UK and is part of the UK national infrastructure.
- BES Smart DCC team formed as a dedicated team responsible for L2 support.
- The deal was 20% Application and 60% Hosting.
- The contract duration is 5 years with \$40M TCV.
- The Smart DCC system went live in March 2021.
- The main activity of migrating 12M Smart Meters has started.

BES Energy Accounts - Background

- BES Energy currently supports two main accounts called npower and Smart DCC.
- Smart DCC was an important win as all of the Smart Meter business from npower will be migrated to Smart DCC by early 2022.
- ElectraLink has also been delivered by standard DXC AWS team offering.
- Smart DCC is a full replacement for npower and ElectraLink.

Objectives

- Focus on the Energy industry processes and requirements.
- Support the accounts on bids and sales using this focus.
- Ensure the BES Energy team are aligned with APPS AMS processes and training materials.
- Deliver solid services to end clients and DXC accounts with over achieved SLA.
- Assists accounts with their Margin and sale improvement plans and organisation moves.
- Place BES Energy to support activities that are not available in other part of DXC as a service.

BES Energy Accounts

Managed Accounts:

- RWE Npower - Head end systems and Smart Meters across UK. \$12M TCV for initial phase.
- Smart DCC - \$40M TCV – UK National infrastructure services.

Thank you.
