B2B Visibility

B2B Process Visibility Overview

DXC Value Proposition

Challenges

- A little history
- B2B Business Challenges

Our solution – B2B Process Visibility

- Where can DXC Visibility Help
- How it works

B2B Visibility Demo

- Order to cash process visibility

Other solutions

B2B Visibility – Value Proposition

DXCs B2B Visibility portal will enable clients to reduce operational costs, improve data integrity, improve trading partner communication, and gain valuable analytical insight into supplier performance.

Our Approach is low risk with a low capital expense and usage based pricing.

Information Systems Evolution

How did we get here?

1980

Decentralized Systems

Islands of Automation – decrease of productivity, efficiency and customer responsiveness

1990

ERP Implementations

ERP expansion simplified and automated business processes within the enterprise

2000

Trading Network Automation

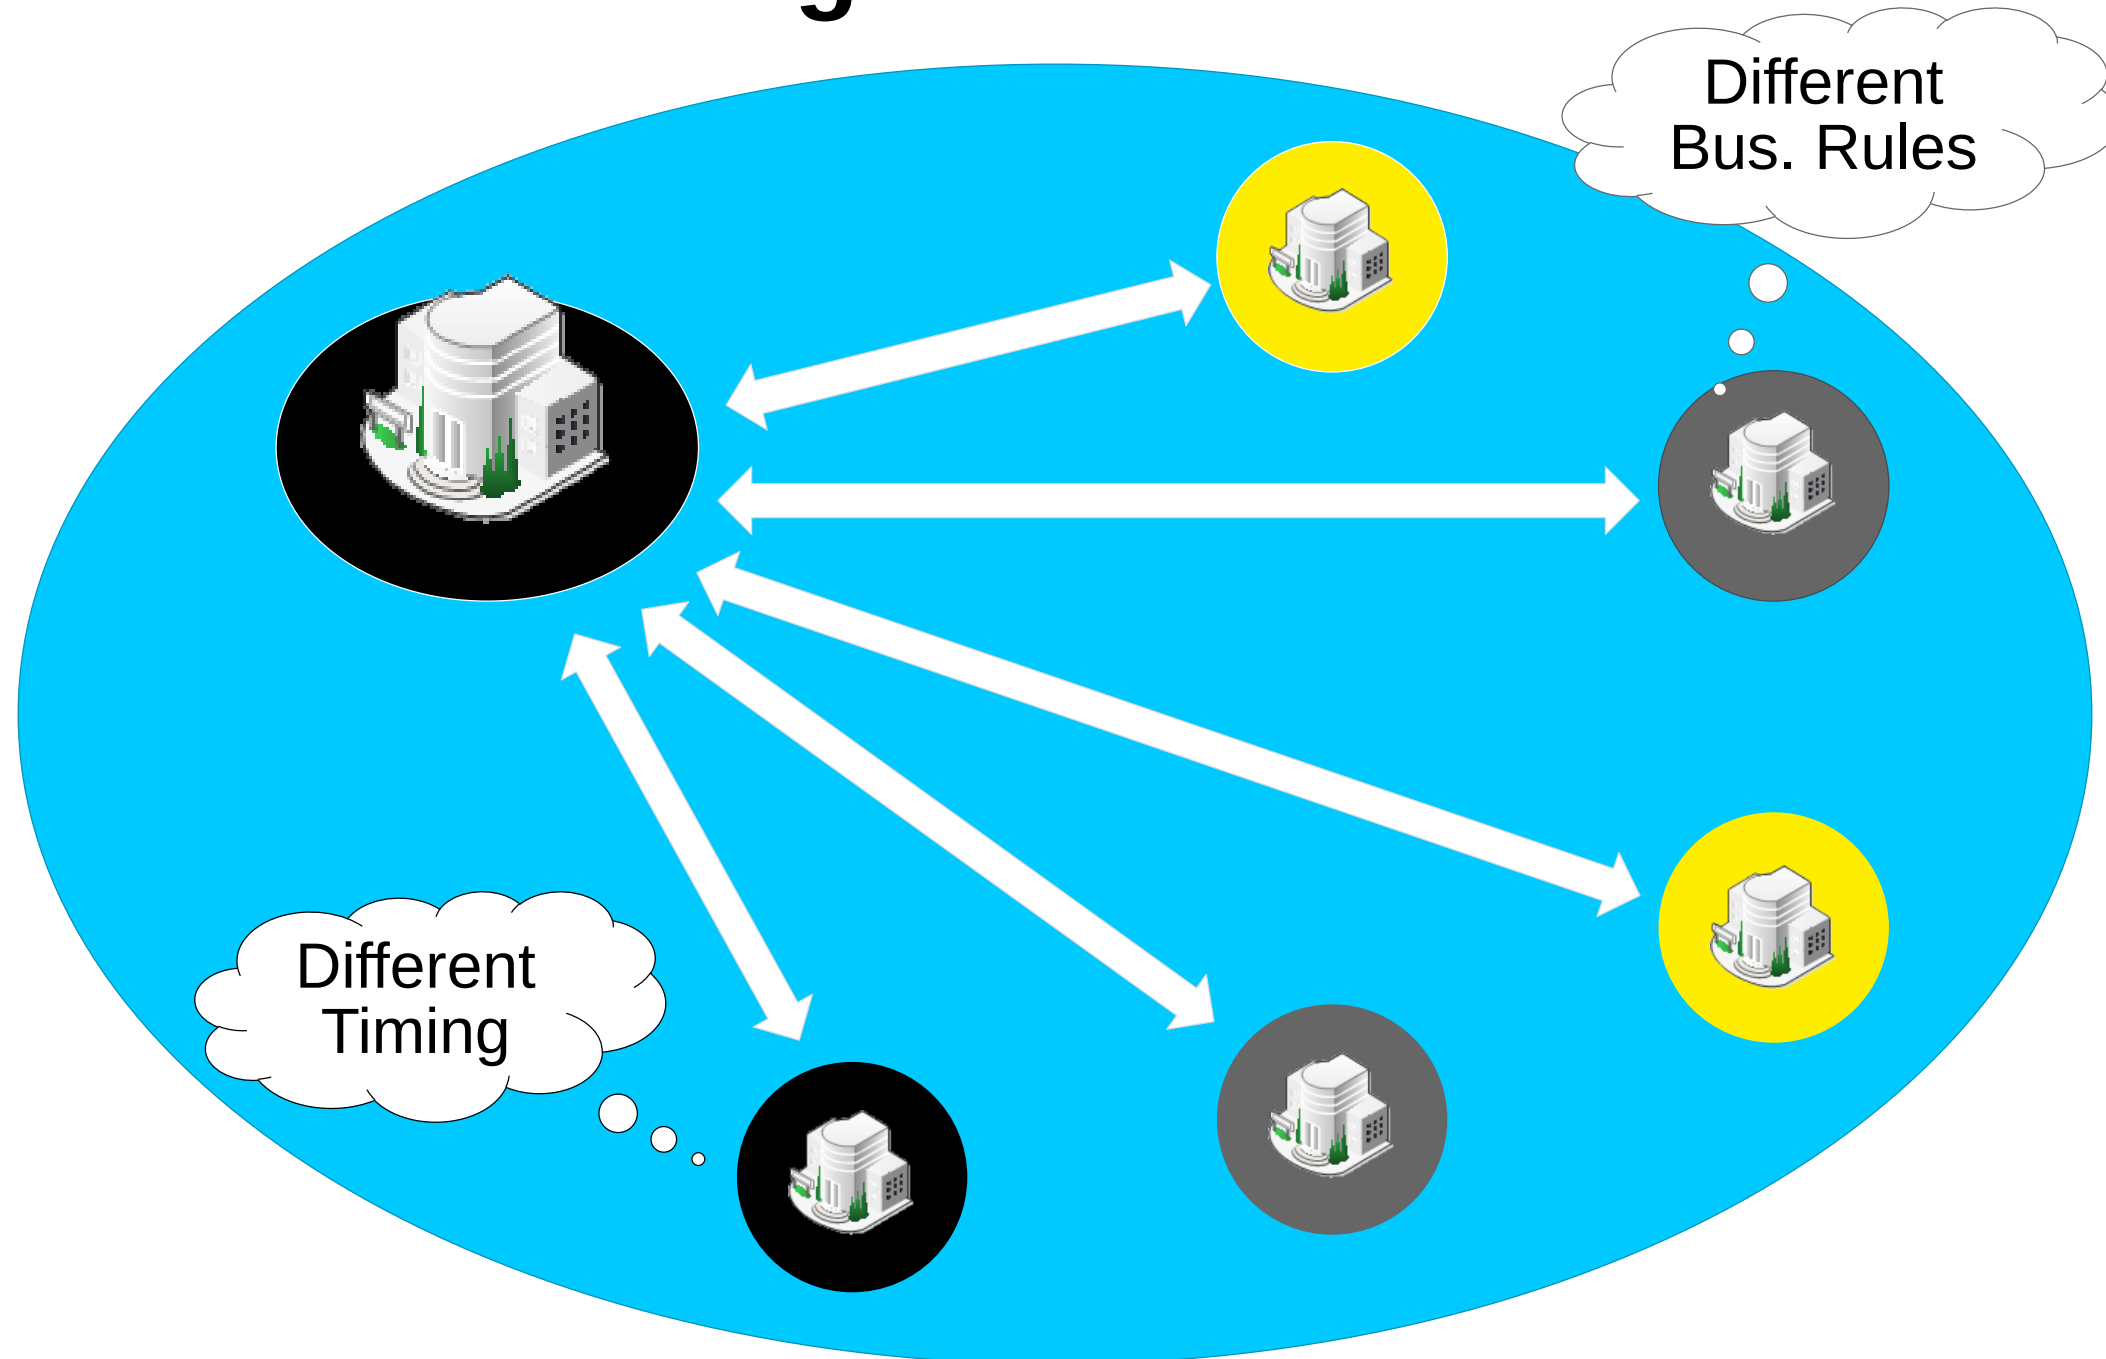

B2B integration, trading partner on community on-boarding

2010

Supply Chain Visibility

Expand visibility into supply chain processes outside the enterprise

B2B Business Challenges

Where can B2B Visibility Help?

Compliance Visibility (Scorecard)

- Invalid Shipment number
- Invalid SCAC Code, etc.

Transaction Visibility

- View B2B transactions content in flow
- View transaction statuses (current/historical)

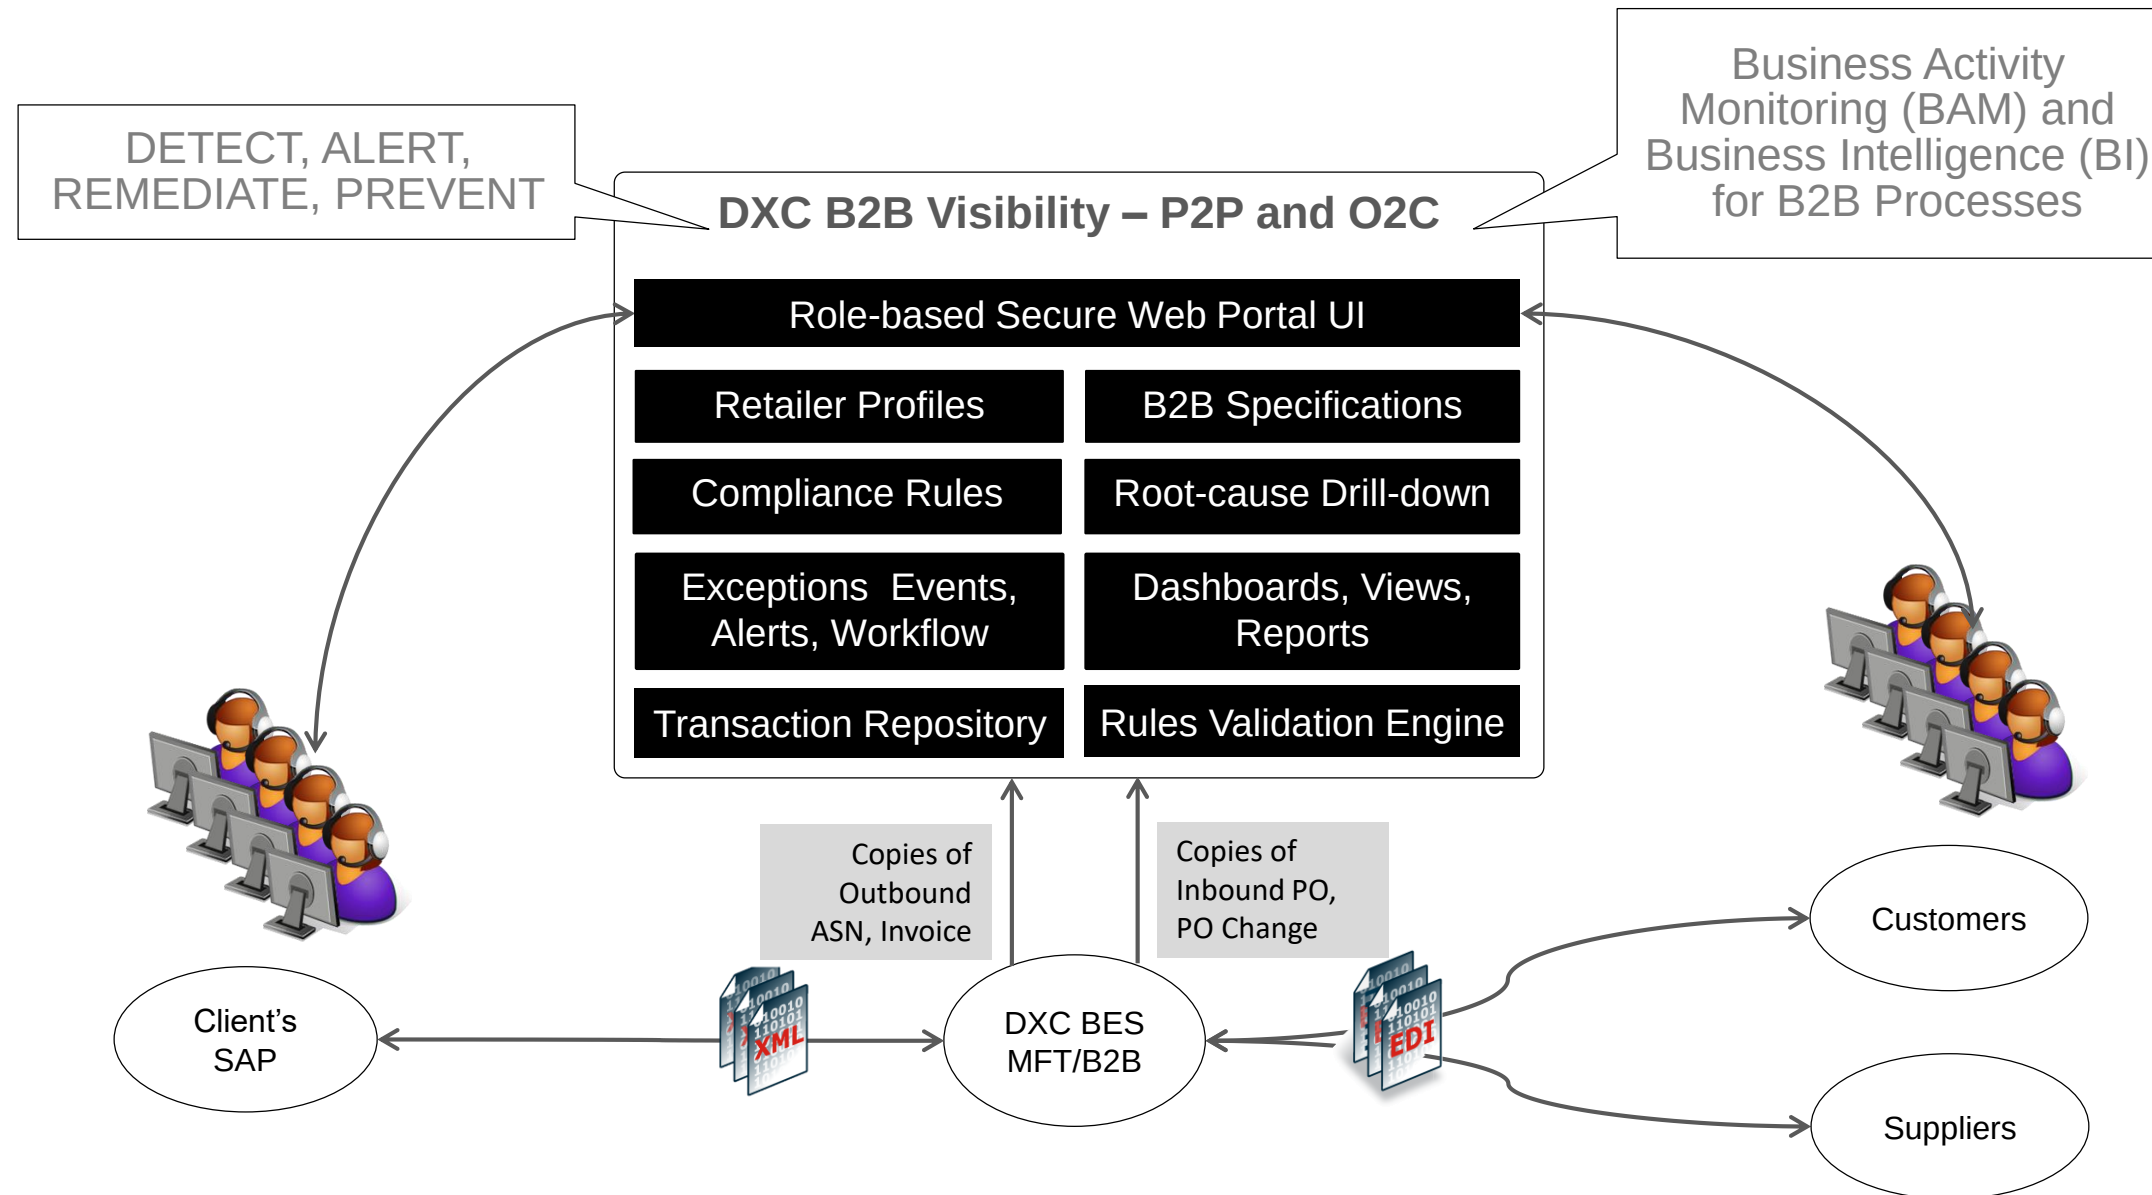

Process Visibility

- Cross document data correlation and validation
- Timing (ex. was ASN generated on time)

Supply Chain Visibility (Analytics)

- Was the order delivered?
- Product Activity Analysis

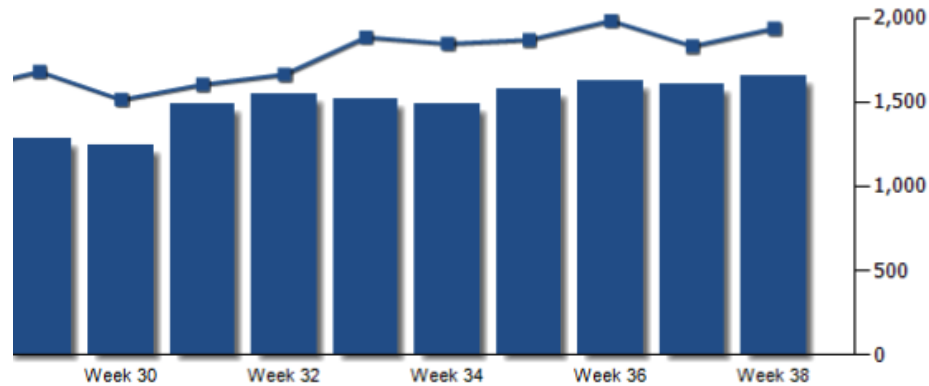

How it works?

DXC B2B Visibility Demo

Sample Order-to-Cash Process

Other Solution Areas

Product Activity Reports

Error Group	Financial impact	
Customer Service (1049)	\$157,350.00 (92.26 %)	
Shipping window missed (873)	\$130,950.00 (83.22 %)	
Order shipped after the allowed time (103)	\$15,450.00 (9.82 %)	
Order shipped after cancellation date (73)	\$10,950.00 (6.96 %)	
Warehouse/Transportation (34)	\$6,800.00 (3.99 %)	
Billing (17)	\$3,400.00 (1.99 %)	
B2B Errors (60)	\$3,000.00 (1.76 %)

Additional Slides for reference

Transaction Errors Costs Companies \$Millions

- Up to 23% of demand side transactions have information based errors.
- Impacts to supply chain and order-to-cash cycle:
 - Finance: Accounts Receivables (DSOs) are twice as long as error-free transactions
 - Inventory: Shipment quantities don't match orders
 - Sales: Shipments are delayed to Plants, Distribution Centers and Stores.

In some industries, data errors turn into “fines.” A \$500M retail vendor can have up to \$6M in B2B-compliance related deductions each year.

Source: Yankee Group

DSO = Days Sales Outstanding – a measure of how quickly invoices are being paid

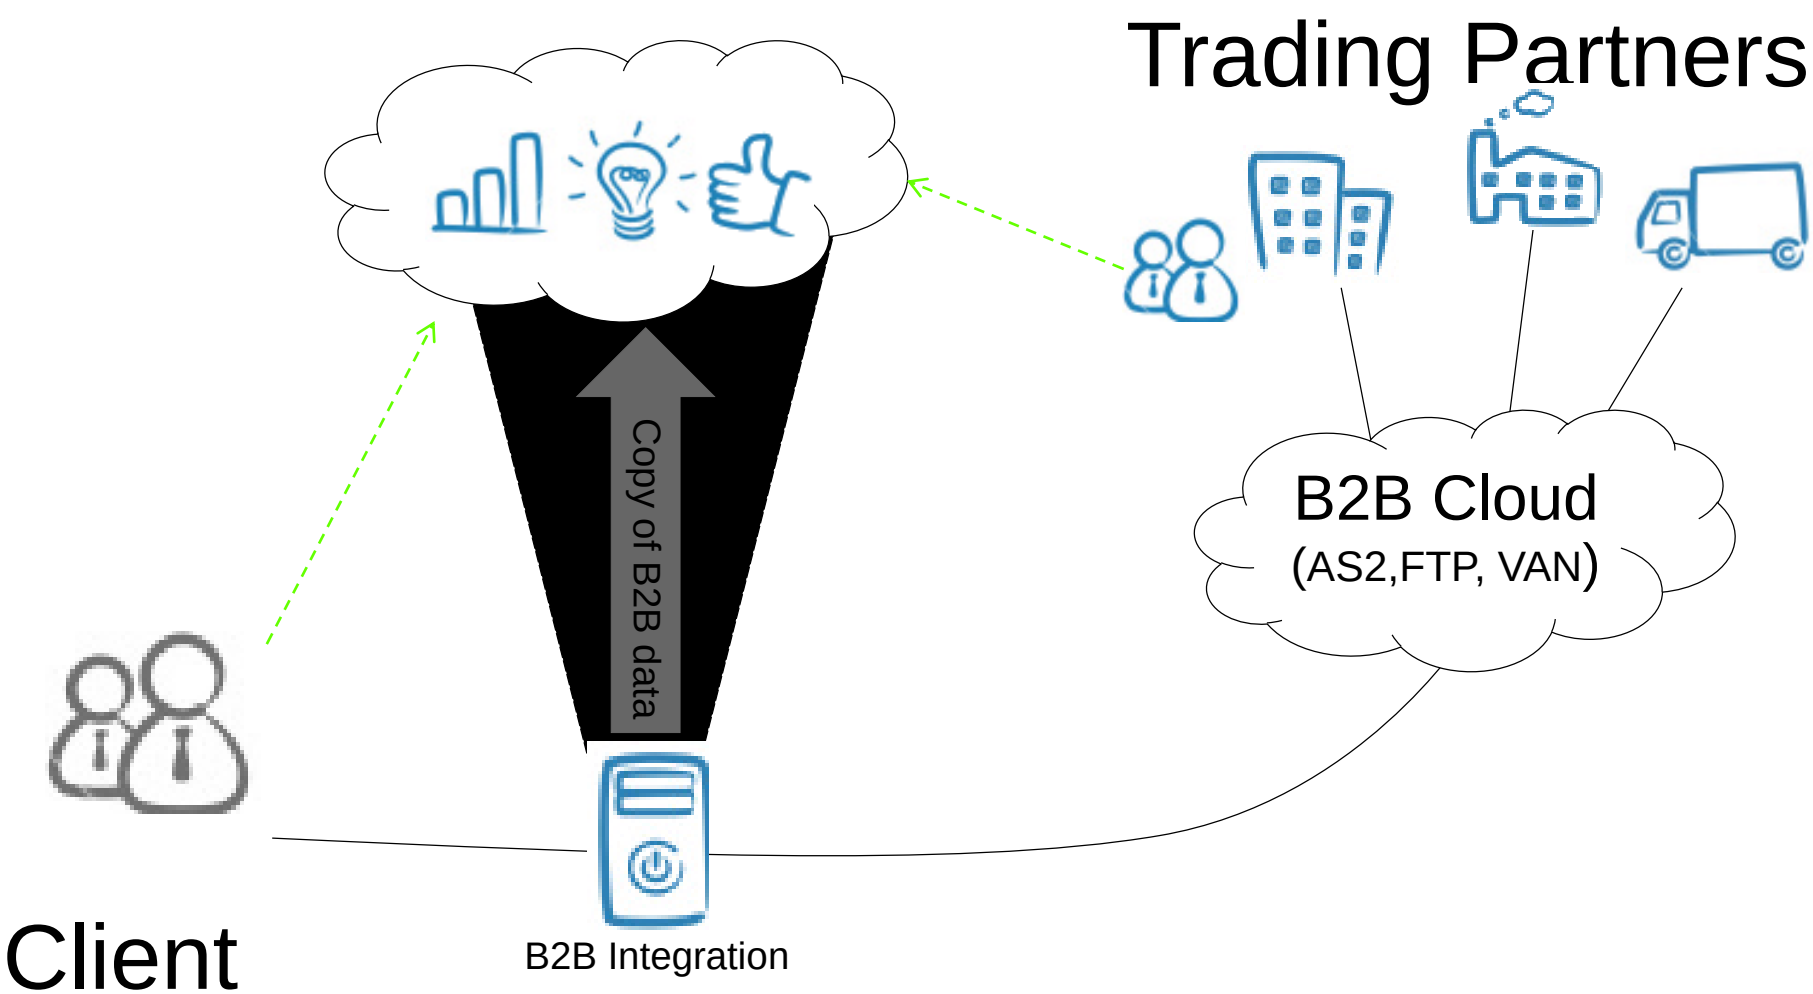

Validating Transaction “Syntax” is NOT enough

Most B2B Systems can only validate the format

Error Type	What's in question?	Sample errors
Mapping / Structure	• Do you have the data they want? • Is it in the right place, right format?	• Missing referring PO Number • Missing detail ASN info (carton level)
Data Integrity / Business Content	• Is it the right data? • Is the information correct?	• Invalid shipment number • Invalid SCAC code
Process Mismatch	• Is the information consistent across various documents?	• Invalid PO # on ASN • ASN quantity not matching PO quantity
Timing / Execution	• Did you send it when/how they wanted? • Did they get it when/how they wanted?	• Missing / late ASN • Failure to notify TMS

DXC B2B Visibility

Non-intrusive data mining and intelligent reporting

Common pitfalls of B2B process management

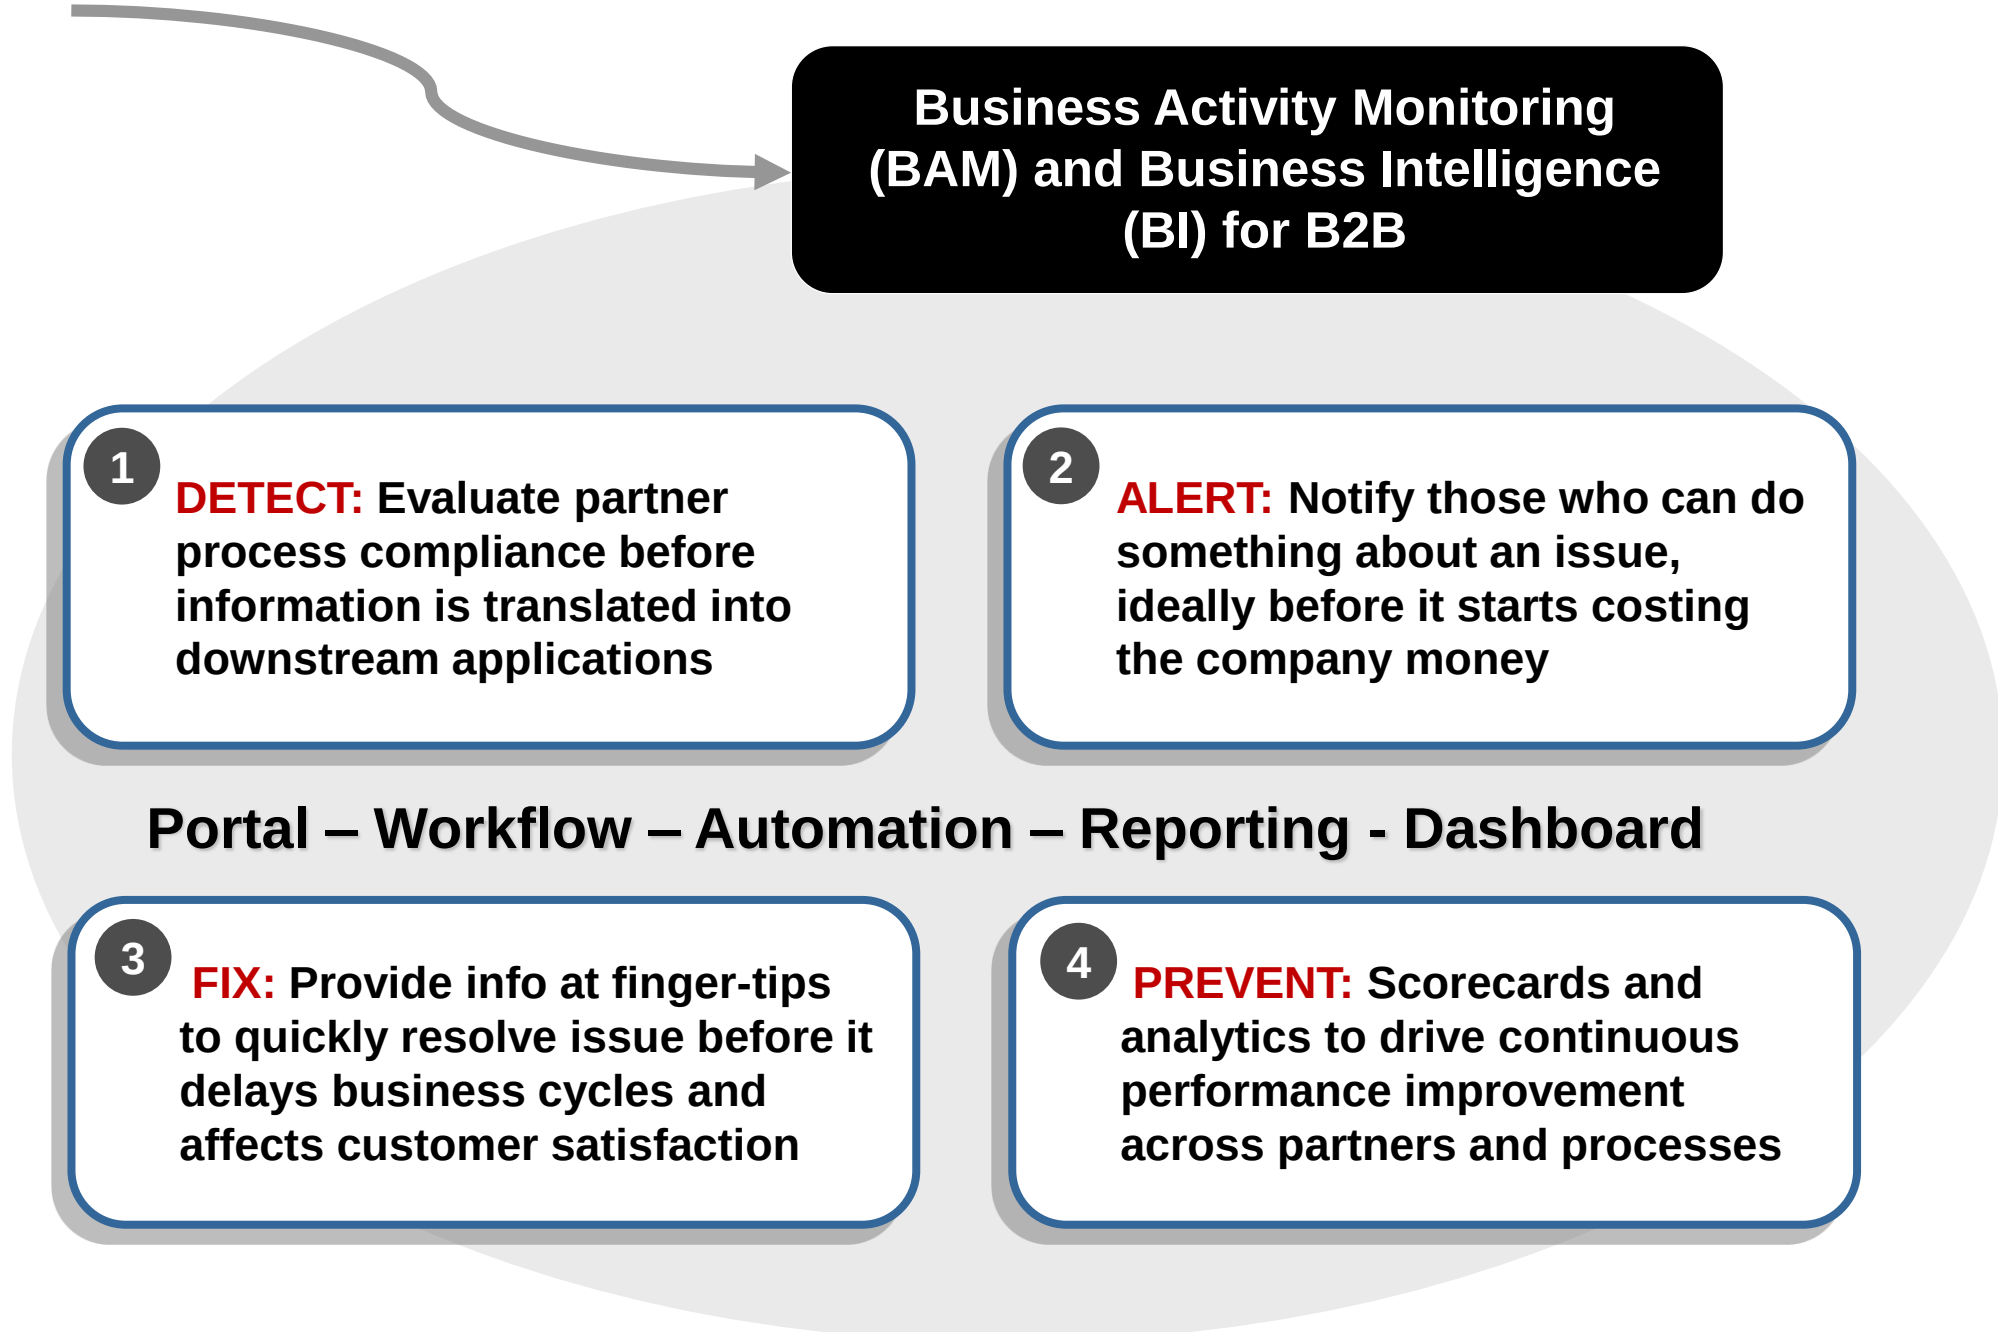

- B2B process rules are maintained in multiple downstream applications, resulting in **redundancy and lack of coordination**
- Since there **is no “single source of the truth”**, changes create havoc (errors, re-work)
- Scattered validation makes it next **to impossible to measure processes and partners** to drive improvement efforts
- Key compliance **issues are identified too late** to prevent damage to process or end customer, resulting in **real \$ losses**.

Organizations are **unable to focus and prioritize** resources to the problems that are costing the company the most

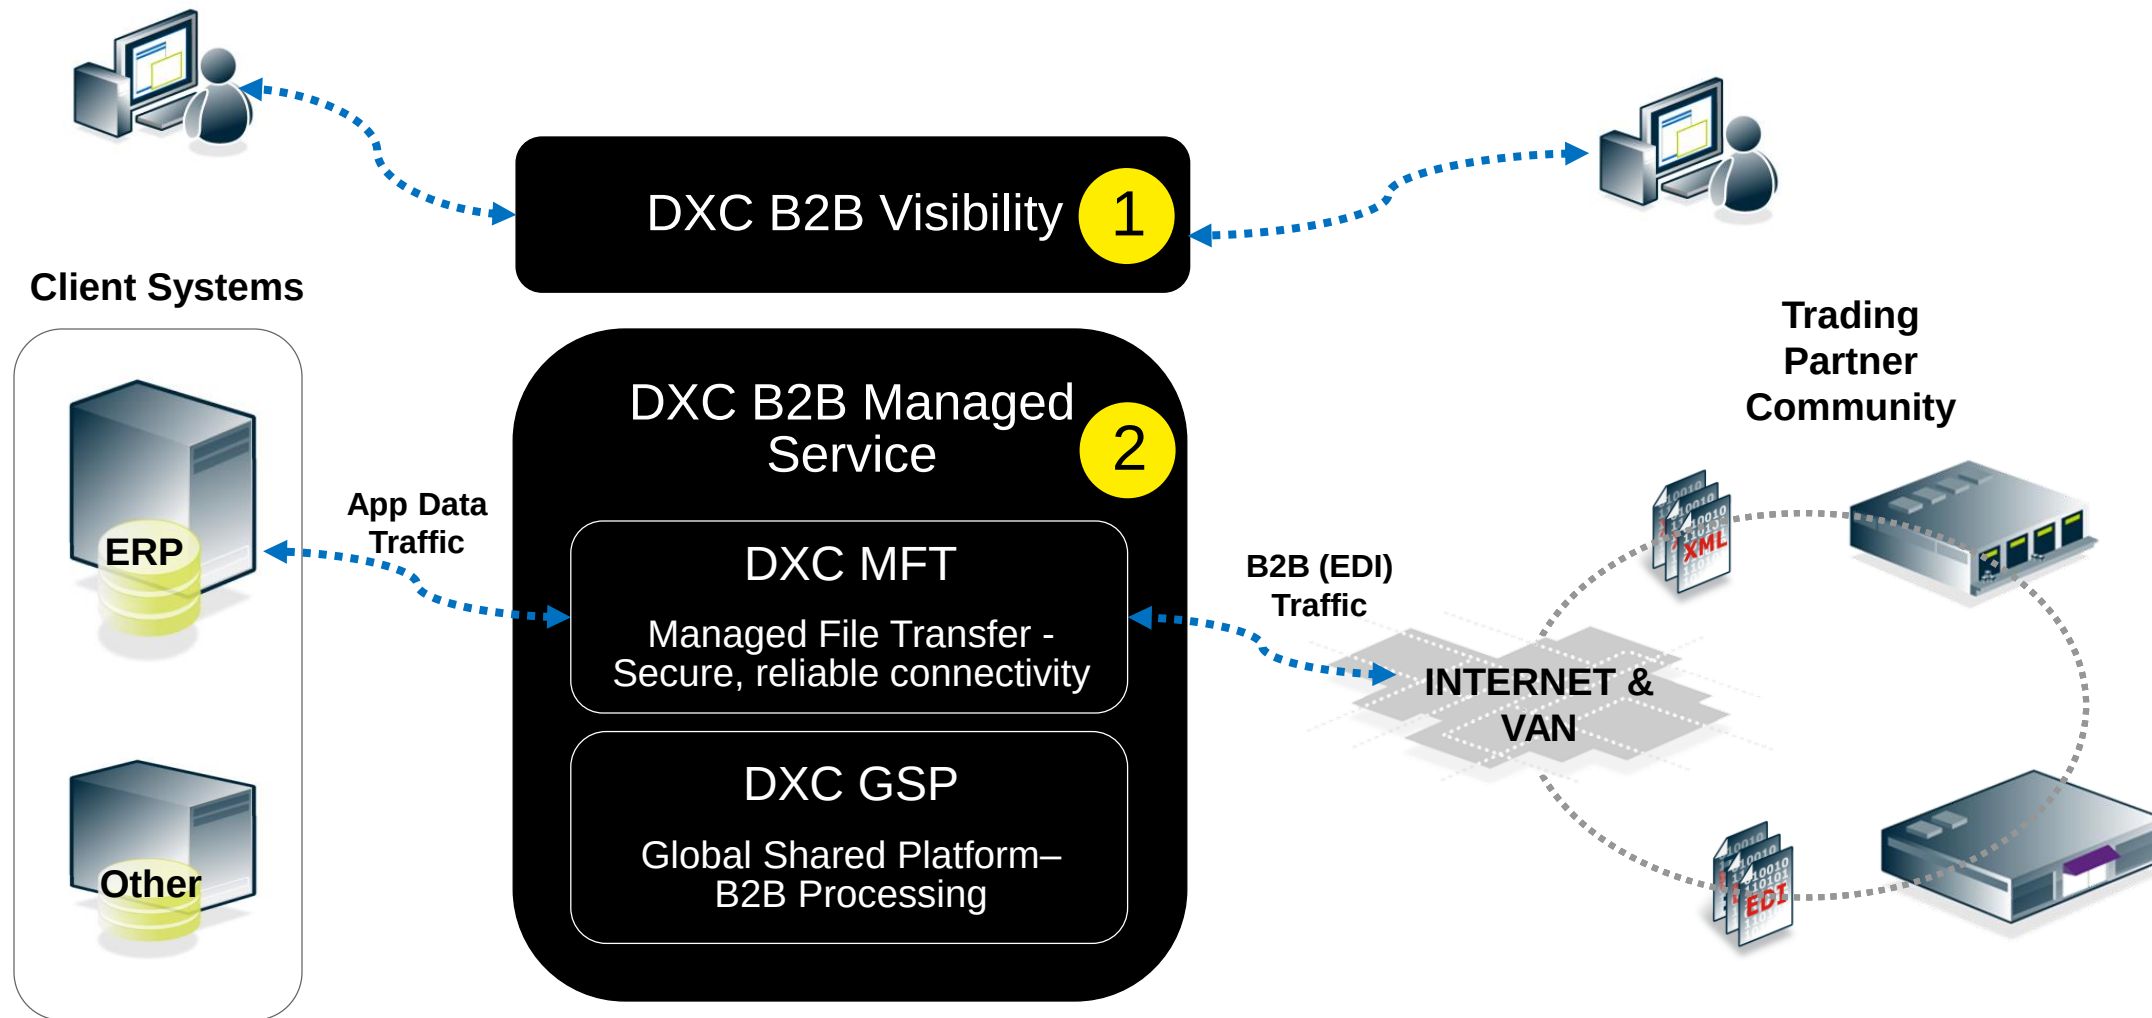

Detect – Alert – Fix - Prevent

Best Practices

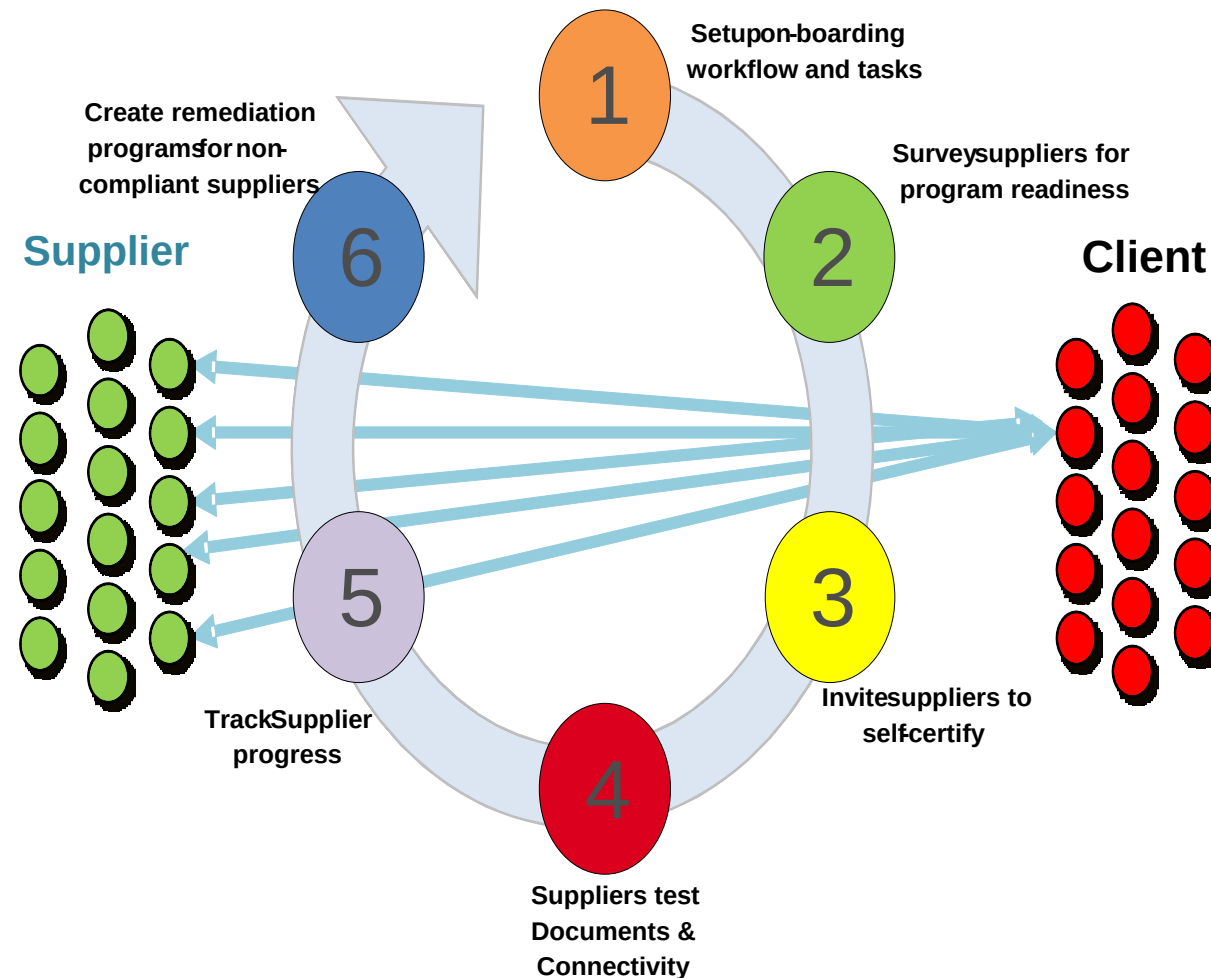

Typical Client Solution Architecture

Demonstration Flow

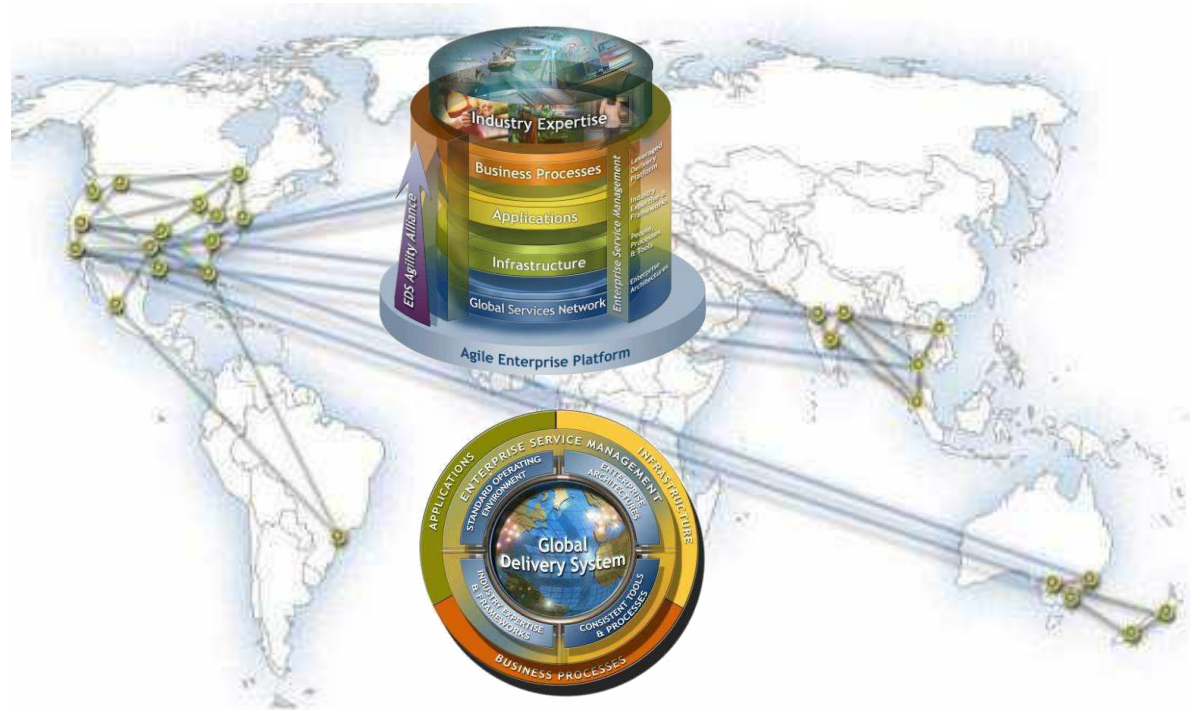

DXC BES Has 25+ years of Experience Managing 130,000 Trading Partners

- Experienced team – manages 130,000 Trading Partners
- Multiple Languages and regions
- Mature Process
- Flexible Approach
- Core Competency

DXC Business Exchange Services – 25+ Years of Experience & Deep Expertise

- 1,750+ clients & 130,000 trading partners in 29 countries
- 3 Billion+ kilo characters/year
- 200+ B2B Professionals
- 25+ years in business
- 4 global processing centers
- Multi Tenancy
- SAP Integration
- Document Translation
- Partner Management
- End to End Support

Healthcare

DXC BES Solutions and Value Provided

Solution		Key Values	Other Benefits
Managed File Transfer (MFT and SEE FX)	Connect reliably and securely to VAN and Internet trading partners. Secure file sharing.	Cost Reduction - 40-80+% reduction in TCO of B2B communications	Reduced complexity; fast setup
B2B Managed Service	Migrate B2B processing to DXC; send and receive ERP data over a single connection – DXC translates and connects the trading partners, and supports end-to-end	Cost reduction - 20-40% reduction in TCO of B2B operations	Op Ex vs. Cap Ex; modernization; standards, DRP; scalability
B2B Visibility	Mine and present B2B data for real-time dash board, exceptions, and decision support	Supply chain performance improvements (in stock, reduced freight, charge backs, vendor score card, etc.)	Staff productivity; customer satisfaction
Portal & Trading Partner Enablement (P2P and O2C)	Web-based trading partner integration; digitizing inbound paper/fax, outbound multi-channel	Cost reduction through greater utilization of automated channels	Better partner relationships; lower overall supply chain cost
Trading Partner On-boarding and Management	Portal driven on-boarding campaign with highly automated methodology	Cost reduction through greater utilization of automated channels	Faster time to benefits; fewer errors
eInvoicing (Demand side)	Portal bill presentment, country eCompliance (signature, tax IDs), PDF, email delivery	Legal compliance; reduced DSO (30-60%)	AR productivity; customer satisfaction
eInvoicing (Supply side)	Vendor bill consolidation (paper, fax, web, EDI), cleansing, country eCompliance (signature validation+), archiving	Cost reduction in AP; reduced disputes affecting supply	Improved supplier relationships; audit readiness

Monitor Performance with Dashboards

Manage Performance with Process Explorer

The screenshot displays the 'Process Explorer' interface. At the top, there are filter sections: 'All partners profile' (1 partner selected), '1 process type selected', 'Select process state', and '2 error types selected'. A 'Reset Filters' button is on the right. Below these are date pickers for 'Enter minimum start date' and 'Enter maximum start date'. A 'Show 15 items on page' dropdown is present. The main table has columns: S, From, To, Type, and Nu. It lists several 'Order-to-Cash' processes for 'COMPANY M' and 'COMPANY X5 DEPT1'. A yellow callout box with the text 'Track errors in business processes by period, type or partner' has an arrow pointing to the 'From' column. On the right, a list of error types is shown, with 'Missing invoice' selected. The bottom of the interface shows another 'Show 15 items on page' dropdown, 'Page 1', and a '1' indicator.

Track errors in business processes by period, type or partner

- ☐ Invoice for product that was not shipped
- ☐ Invoice quantity does not match ASN
- ☐ Invoice/ASN rejected by partner
- ☐ Missing carrier code
- ☐ Missing carrier's reference number
- ☒ Missing invoice
- ☐ Multiple shipments against a single PO
- ☒ Multiple shipments to a single location
- ☐ No acknowledgment of shipping order receipt (Error)
- ☐ No acknowledgment of shipping order receipt (Warning)
- ☐ Order IA Reference does not match ASN IA Reference
- ☐ Order IA Reference does not match invoice IA Reference

Sample Rules in B2B Process Visibility

Global Structure Rules

- A shipment must contain at least one order
- An order must reference a shipment
- Missing required segments (i.e., BSN, HL, TD5, LIN, etc.)
- Duplicate segments (where duplicates are not allowed)
- Unpaired segments (i.e., address must come with name in an N1/N4 pair)

Pick Pack Detail ASN (Shipment/Order/Pack/Item)

- An order must contain at least one tare or pack
- A tare must contain at least one pack or item
- A pack must contain at least one item
- Items must reference a pack or tare (should not reference an order)
- Packs must reference a tare or order
- Tare must reference an order

Standard Pack Detail ASN (Shipment/Order/Item/Pack)

- An order must contain at least one item
- An item must contain at least one tare or pack
- Packs must reference a tare or item
- Tares must reference an item
- Items must reference an order

Summary ASN (Shipment/Order/Item)

- Summary ASNs should not contain tare or pack information
- An order must contain at least one item
- Items must reference an order

Sample rules in B2B Process Visibility

ASN Content Errors

- Invalid ship from / ship to location
- Invalid tare or pack number
- Invalid count, total, or quantity
- Invalid item number format
- Invalid unit of measure
- Other conditional field pairs (i.e., time / time zone, qualifier / value)
- Other code list validations
- Other required field validations

ASN Content Errors (cont.)

- Invalid sender ID or vendor number
- Invalid transaction purpose code
- Invalid shipment number
- Invalid structure code
- Invalid date/time format
- Invalid carrier reference number
- Invalid BOL number
- Invalid SCAC code
- Invalid payment terms (FOB)

Sample data violations identified by B2B Process Visibility

ASN Content Errors

- Invalid ship from / ship to location
- Invalid tare or pack number
- Invalid count, total, or quantity
- Invalid item number format
- Invalid unit of measure
- Other conditional field pairs (i.e., time / time zone, qualifier / value)
- Other code list validations
- Other required field validations

ASN Content Errors (cont.)

- Invalid sender ID or vendor number
- Invalid transaction purpose code
- Invalid shipment number
- Invalid structure code
- Invalid date/time format
- Invalid carrier reference number
- Invalid BOL number
- Invalid SCAC code
- Invalid payment terms (FOB)

Sample process rules in B2B Process Visibility

Process (PO/ASN)

- The PO number in the ASN must reference a valid PO
- The PO number in the ASN should not reference a canceled PO
- The item number and quantity in the PO must be matched by the ASN (short fill)
- The item number in the ASN must exist on the PO (unknown item / substitution)
- The shipped unit of measure in the ASN does not match the ordered unit of measure
- The payment terms in the ASN must match the payment terms in the PO
- For collect shipments, the SCAC in the ASN must match the SCAC specified in the PO (or a preferred carrier list)
- The ship date in the ASN must be after the start ship date in the PO
- The ship date in the ASN must be before the cancel date in the PO
- The ship to location in the ASN must match the ship to location in the PO
- The mark for location in the ASN must match the mark for location in the PO

Process (ASN/Shipment Status)

- The carrier pickup notification must be received within XX hours of the shipment date specified in the ASN
- The carrier delivery notification must be received within XX hours of the delivery date specified in the ASN
- A carrier pickup notification was received for an unknown shipment (missing ASN)

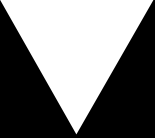

Process (ASN/ASN)

- Only one ASN marked as original can be sent per shipment (duplicate)
- A replacement ASN cannot be received prior to an “original” ASN
- The ASN create date and time in the replacement ASN is earlier than in the previous ASN received
- A replacement ASN was not received within XX hours of rejecting the original ASN
- The ASN was not received within XX hours of the ship date and time (late ASN notification)

Sample timing / execution violations identified in B2B Process Visibility

- **Missing ASN**
- **Missing 997**
- **Shipment Status messages received out of order**
- **Missing proof of delivery**

Thank you.
