

# Business Exchange Services (BES)

**Manufacturing Industry Experience**

# BES and Manufacturing

- Outsourcing the management of business transactions to DXC BES lets manufacturers focus on core activities instead of spending time and money on technical issues. It also delivers the following benefits:
  - Improves trading partner relationships
  - Optimizes cash flow
  - Increases transaction accuracy
  - Ensures timely transaction delivery
  - Enhances flexibility
  - Ensures industry compliance
- BES provides a suite of offerings that address manufacturing industry e-commerce needs that can be matched and scaled, including:
  - Connectivity via value-added networks, Internet, telephone networks, and other communications
  - Translation (standard and proprietary formats)
  - Media conversion (between ASCII and fax/paper)
  - Extended archiving
  - Trading community management
  - Trading partner supply chain software and services

# EDI Manufacturing Client: Battery Manufacturer **DURACELL**

**Duracell is the world's leading manufacturer of high-performance alkaline batteries, specialty cells and rechargeables with \$2 billion a year in revenue.**

## Business need

- Duracell was being spun off by P&G and had a short timeframe to be off P&G's books and in-house systems

## DXC solution

- Business Exchange Services (BES) was responsible in 2015 for implementing the Duracell EDI service on the BES EMEA Managed Service Platform and then operating it for 36 months
- The scope of the implementation project included the migration of 75 maps and 300 trading partners. BES also provides Duracell with Managed File Transfer and Web Order Management professional services.
- Duracell and DXC have now executed a change that extends the end date of the current work statement another two years from Dec. 31, 2018 to Dec. 31, 2020.

## Client outcome

- BES' EDI Managed Service delivers messages to and from Duracell's trading partners across Latin America, North America & EMEA (30 countries)
- BES Web Order Management serves over 1,500 Duracell customers, covering retailers, wholesalers and sales reps in 6 languages (English, Spanish, Portuguese, Italian, French and Dutch) from 11 countries on 4 continents: Chile, Mexico, Panama, United States, Canada, Italy, France, Spain, Portugal, Great Britain and Russia
- "Thank you for the support you provide to Duracell. Your hard work and customer focused delivery is why Duracell extended this work with DXC. Please keep up the good work!"

# EDI Manufacturing Client: Automotive Supplier

The leading Tier 1 South Korean based manufacturer of automotive systems including brake, steering, suspension, driver assistance and electronics.

## Business need

- Effective communications with trading partners around the globe require efficient business communications capabilities. The client exchanges more than 40,000 documents with its customers each month. But a wide variety of exchange standards, some outdated, and an equally complicated array of communications methods significantly challenged the client. The client needed fast, easy EDI connections that could modernize processes, handle a variety of standards and reduce expenses

## DXC solution

- EDI standards & documents utilized:  
**X12:**  
Planning Schedule, Shipping Schedule, Shipment Notice, Functional Ack, Purchase Order Ack, Remittance Advice, Receiving Advice, Production Sequence, Application Advice  
**EDIFACT:**  
DELFOR, DESADV, CONTROL
- External B2B integration services
- Multi-country support

## Client outcome

- Simplified/integrated Mando's order management and tracking of shipments. Ability to leverage the inbound orders to generate outbound shipment notifications

# EDI Manufacturing Client: Thomas Built Buses (Daimler Trucks)

## Business need

- The existing EDI software and system infrastructure was not meeting business needs, and expensive upgrades became necessary
- TBB went looking for a managed solution for EDI with SAP interface experience
- TBB selected DXC BES based on cost-benefit analysis

## DXC solution

- DXC MFT handles all trading partner connections and data transfers using secure protocols, and VAN inter-connections.
- DXC EDI Managed Service manages EDI translation (EDI and flat files), and monitors and tracks each transaction end to end.
- Supplier side:
  - EDI 830 Planning Schedule, 866 Production Sequence, 850 Purchase Order, 860 PO Change, 856 Advance Ship Notice, 810 Invoice
- Aftermarket side:
  - EDI 850 Purchase Order, 856 Ship Notice, 810 Invoice

## Client outcome

- With DXC's project team's help, TBB was able to seamlessly transition their trading partner processing to DXC without any disruption to the business
- TBB was able to retire and decommission their aging and expensive in-house EDI system
- TBB realized significant Total Cost of Ownership reductions, and is able to respond quickly to new requests, and changes in business practices
- TBB can now add partners at will, with a well-defined process and roles/responsibilities between TBB and DXC

TBB Customer Comment from latest satisfaction survey (1/23/2017): What one thing about Business Exchange Services provides the greatest value to your business? **Speed and Quality of Service**

# EDI Manufacturing Client: Global North American Automotive Company

**2nd largest global automotive manufacturer with operations in 150+ countries**

## Business need

- The client needed to process large numbers of file transfers between manufacturing plants, parts suppliers, vendors and dealerships to support their world-wide just-in-time order, fulfillment and delivery cycle. They also required guaranteed and protected integrity, security and delivery of critical financial data

## DXC solution

- The client relies on the DXC Service offering to handle their file transfer management needs. DXC provides connectivity between manufacturing plants, parts suppliers, vendors and dealerships to support the worldwide just-in-time order, fulfillment and delivery cycle. The DXC service also handles the guaranteed and protected delivery of critical financial data, maintaining integrity and security through a robust authentication and encryption layer

## Client outcome

- By utilizing the managed service offering from DXC, the customer is free from concerns related to on time delivery of critical EDI transmissions or timely set up of new trading partners. The DXC Service desk monitors the environment and handles issues without interrupting the customer from their primary jobs. A dedicated DXC support staff ensures that reliable service levels are maintained and continuous improvement remains a focus
