

BES Solutions and Value Provided

bes-sales-support@dxc.com

Solution	Description	Key Value	Other Benefits
Managed File Transfer (MFT)	Connect reliably and securely to VAN and Internet trading partners	Cost Reduction - 40-80+% reduction in TCO of EDI communications	Reduced complexity; integrates seamlessly with most protocols
File eXchange Service (FXS)	Secure human-to-human file sharing	Eliminate security breaches of ad-hoc file transfers	Fast setup; high-speed ad hoc file transfers of large and confidential files
EDI Managed Service (Fully leveraged & Hybrid)	Migrate EDI processing to DXC; send and receive ERP data over a single connection – DXC translates and connects the trading partners and supports end-to-end including e-Invoicing compliance. Leveraged as well and dedicated platforms available.	Cost reduction - 20-40% reduction in TCO of EDI operations	Op Ex vs. Cap Ex; modernization; standards, DRP; scalability
Dedicated EDI Service (SEEBURGER)	Dedicated and bespoke EDI or File-Transfer solutions based on SEEBURGER Software, on-premise or in the cloud	High levels of flexibility and customization opportunities to meet specific company and industry needs	Industry specific configuration frameworks. Tools for partner self-service, partner management and migration
Trading partner EDI enablement	Web/mobile tools for smaller trading partners to use clients' more automated EDI channels, also providing light integration via CSV	Cost reduction - automates “the long tail” that otherwise tends to generate out-sized error rates and support calls	Provides an efficient channel for on-going communications with hundreds or thousands of smaller trading partners, self-serve platform
Trading community onboarding and management	Accelerated, managed campaigns to onboard hundreds/thousands of client trading partners via self-serve portals and support staff.	Speed-to-value – realizing automation savings sooner
