

Business Exchange Services

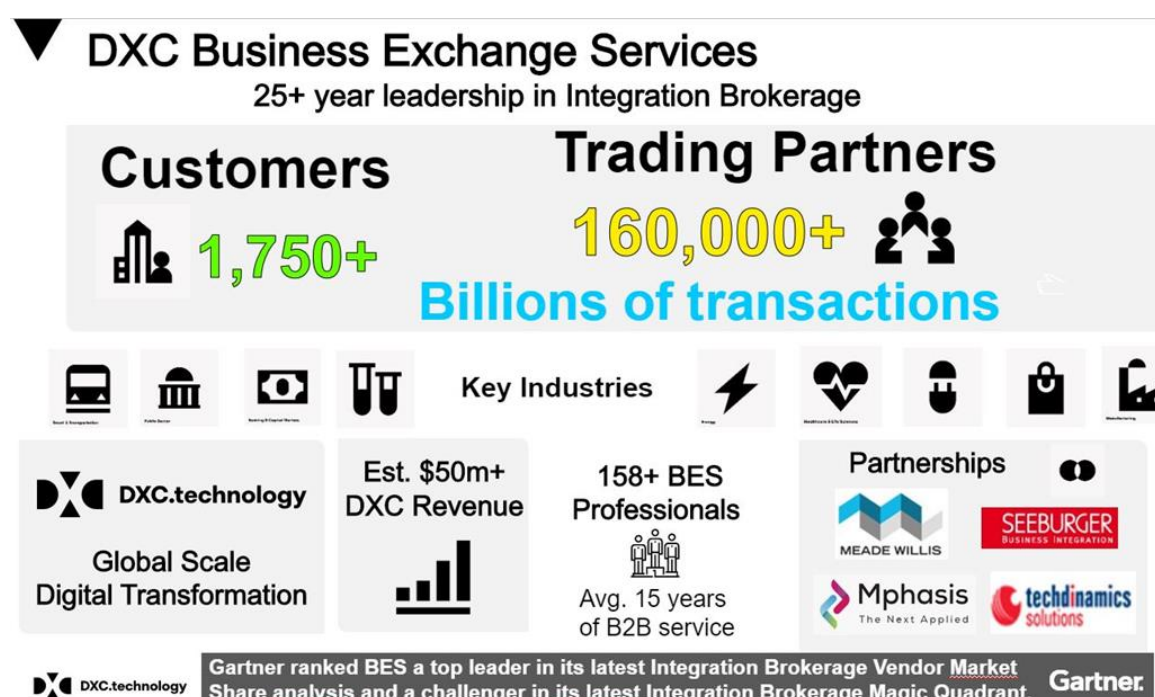

Business Exchange Services (BES) offers a comprehensive set of business-to-business (B2B) services that enable clients to integrate and automate trading partner processes with internal applications without the expense and complexity of installing and running a B2B environment themselves.

What is It?

Offering Description

Business Exchange Services (BES) provide global, scalable B2B solutions and services that enable clients to communicate, connect, and exchange data securely and reliably with their trading partners in a cost-effective way. BES improves business performance and accelerates growth through platform optimization, integration, process and community management, and visibility service capabilities. BES provides exceptional value through an end-to-end managed services solution, freeing up our client's financial and human capital for reinvestment and growth.

This robust solution is further enhanced by advanced data reconciliation, rules administration, secure global managed file transfer network, and full service trading partner management—all supported by industry leading client responsiveness. Pricing is based on service provided, per document, per kilocharacter (1,000 bytes), subscription, per trading partner, and process, and time and materials. These services can be sold "a la carte" (\$50,000 to \$3 million) or bundled (\$3 million to \$20+ million).

Value Proposition

EDI is messy. But for over 25 years, BES has managed this mess for our clients, allowing them to focus on their own mission, while saving

thousands of dollars a month in the process. We understand that our clients’ trading community eco system is a key asset, one that must work all day every day without disruption. BES’ delivers a hardened B2B integration brokerage service, ensuring secure and reliable exchange of mission critical EDI or XML documents across vast trading networks, while monitoring the flow 24/7 to detect and alert on any discrepancies, be it missing or bad data, standards compliance violations, or late acknowledgments.

With BES as their partner, our clients sleep well at night and thrive, because:

- BES has a proven track record of delivering robust EDI for up to 40% less (compared to in-house)
- BES has built-in dynamic scalability to evolve with our clients’ needs
- BES has built-in disaster recovery and site redundancy for industry-leading availability and up-time
- BES has the most experienced people to support our clients (Average >10 years)

Elevator Pitch

Imagine how B2B information mined from your data for real-time dashboarding, exceptions, and decision support could add real business value to your supply chain partnerships.

What improvements could be made if you could focus on your core business -- without being burdened with outdated IT infrastructure, fragmented B2B applications, time-consuming error research, and trading partner support and onboarding?

BES enables business agility by optimizing the platform, processes, and partners. We deliver proven B2B e-commerce connectivity and integration solutions to manage the flow of information, data translations, and collaborative processes with your entire global trading partner community.

Top 5 reasons to choose DXC

1. **BES offers B2B visibility** to provide data mining and presentation of B2B data for real-time dashboard, exceptions monitoring, and decision support.
2. **BES offers e-Invoice processing and compliance** to help clients meet global tax laws and regulations for electronic invoices.
3. **BES offers File Exchange Services** that ensure secure and reliable human-to-human file sharing (cloud offering) through a secure web portal that empowers businesses to transmit large and/or sensitive files.
4. **Our BES experts understand** the shift from traditional IT to mobility, cloud, Big Data, and social media.
5. **We are ranked #2 by Gartner** for integration brokerage market share and as a Challenger in the latest Gartner Magic Quadrant for Integration Brokerage. BES is included as a Vendor in the latest Gartner Market Guide for Integration Brokerage. *Please note that these documents are a few years old, but Gartner has not made any new Integration Brokerage publications recently.*

Level Setting

Challenges

B2B Challenges Typical in the Industry

- M&A activity leaves an B2B landscape of **under-utilized, fragmented and non-standard** B2B systems and operating environments

➤ **Outdated** and/or **un-supported** B2B software, lacking key features the business needs

➤ **Unable to scale**, extend, and/or add new trading partners or functionality as fast as needed

➤ **Inconsistent Security** policy implementation – security holes abound (FTP, clear text transfers)

➤ Weak or **non-existent Disaster Recovery** and Business Continuity plans and capability
- **Inconsistent monitoring** – lack of end-to-end process visibility, and resulting process failures (lost \$)

➤ **Inconsistent service levels** between different B2B programs in different parts of the company

➤ **Redundant staff** – B2B skills are scattered across people in too many different groups

➤ **Difficulty finding staff** with the right software skills

➤ Old VAN contracts with **costs well above current market pricing**

➤ Ineffective or **absent visibility** and governance – limited or no ability to provide B2B program oversight

PERFORMANCE

COST

Client Pain Points

- Outdated infrastructure and applications—Platforms are fragmented, costly to maintain and extend, difficult to scale, have poor governance, and lack adequate security.
- Trading partner onboarding—Onboarding takes too long, is bottle-necked, and costly to set up and maintain, and has value-added networks (VAN) charges.
- Process visibility—Visibility is low; errors are frequent; and exceptions are costly to research, fix, and prevent.
- Compliance—E-Invoicing requirements are complex and based on regional tax and legislation differences.

Analyst Key Findings

(DXC) offers global IT service delivery from within its BES organization and can utilize its extensive global cloud footprint and IT resources to support Integration Brokerage (IB) projects. BES operates a large B2B network and has a large portfolio of IB projects under management. (DXC) leverages popular features, such as MFT and B2B process visibility, within its IB offering.

(DXC) Business Exchange Services (BES) is a mature IB offering with a global B2B network and a large portfolio of B2B projects worldwide. It serves many industries and geographies. (DXC) delivers IB in both standalone and embedded offerings (e.g., within broader SI projects). (DXC)

offers flexible cloud- or on-premises delivery options and can implement projects using middleware from IBM (Sterling), OpenText (GXS), Seeburger, Axway, SAP, TradeExpress and Edifecs. Typical project use cases include supply chain integration, MFT, e-invoicing, B2B visibility and onboarding via (DXC) Trading Partner Community.

Approach Plan

Identify What Clients Need

- Cost reduction—Reduce cost per business transaction over in-house solutions by consolidating multiple trading formats, reducing VAN charges, reducing or eliminating specialized in-house staff using our leveraged shared resources, and lowering dispute resolution costs.
- Accuracy—Reduce process and transaction failures and eliminate mistakes in dealing with different system interfaces.
- Business risk—Decrease risk through better up-time and consistent and managed security policies.
- Partner relationships—Increase partner satisfaction with fewer errors and better information resulting in more sales and process improvements.
- Scalability—Support growth, change, and technology refresh without disruption, worldwide.
- Compliance—Increase data and process compliance through automated exceptions handling.

Involve expert resources (boilerplate):

- Online research tools

Conversation Starters

- What are the data volumes processed through your current B2B systems?
- Can you provide a breakdown per system and message type/document type: Number of messages, transactions, and kilocharacters?
- Are your current electronic business activities technically supported out of one central solution operated in-house or by an outside service provider?
- Do you currently support any B2B initiatives, for example Web site, marketplace, EDI system, and e-procurement?
- What is the number of current and targeted electronic business partners?
- What is the minimum, maximum, and average file size?
- How many EDI translations (mappings) do you support?
- Which VANs or clearinghouses do you use?
- Is your current B2B system integrated with your ERP and back office systems?

Deal Characteristics

- Thirty-day to six-month implementations (90 day average) based on range of services purchased.
- Deal size of \$3 million to \$20+ million with bundling of services or sold "a la carte" \$10,000 to \$3 million.
- Margins are 40% to 50%.
- Pricing is based on service provided—per document, per kilocharacter, per trading partner, and/or process, subscription, and time and material. Fixed price is also an option.

Proof Points

- BES has more than 200 business exchange services professionals providing world-class B2B solutions globally.
- We are ranked Global #2 in vendor market share by Gartner in Integration Brokerage (11.2%).
- We serve more than 1,750 global clients and more than 160,000 trading partners.
- We are listed as a "Challenger" in the Gartner Magic Quadrant for Integration Brokerage
- We are included as a Vendor in the Gartner Market Guide for Integration Brokerage
- Our AS2 is tested and certified annually by the Drummond Certified™ program for interoperability and compliance.

Questions from the Client

Is BES a major player in EDI?

Business Exchange Services is a major player in the market and competes aggressively with pure plays. With more than 30 years of EDI and trading community integration experience, BES connects more than 160,000 trading partners spanning all industries and global regions. It runs on top of DXC's industry leading data centers, network, and infrastructure management.

How can BES help me with trading partners?

Business Exchange Services provide full-service trading partner management—automatically applying rules to documents, fully automating the certification process, and certifying compliance at the business rule and data level.

How do your costs compare to your competitors?

BES delivers value-based solutions that, when broken down into individual components may not be the lowest cost per component among competitors (nor are they among the highest cost). However, when aggregating a "Total Cost of Ownership" comparison, our solution frequently comes out on top, because it truly is a complete outsourcing service. It enables clients to eliminate all staff and operations involved in the B2B process, while enjoying additional business return on investment from improved reliability, quality, consistency, and security.

Partners & Roles

Leverage core business goals and triggers to create winning opportunities.

High level use cases & triggers

The case for B2B Managed Service

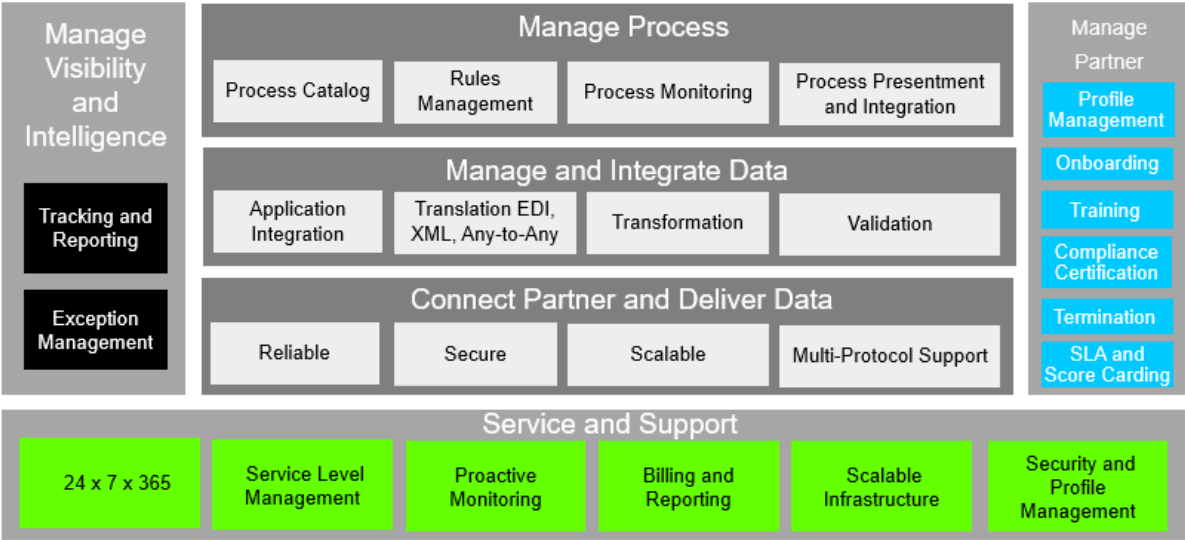

What you get (Higher Performance)

- A single global B2B operating environment
- Modern, flexible B2B software
- Leveraged B2B “Center of Excellence” for well-trained, available, best-shore staff
- Built-in redundancy and fail-over
- Transparent technology re-fresh
- Global governance, control and visibility
- Effective trading partner on-boarding and management
- Consistent service levels
- Consistent security policies

Why It Matters (Lower costs)

- Lower TCO by 20-40%
- Better and leveraged utilization, eliminated capital expenditures (hardware, software), leveraged best shore staffing, and B2B traffic consolidation
- Better ability to support growth and new business requirements
- Fewer process failures – proactive monitoring and end-to-end visibility
- Better overall performance through a leveraged, scalable platform
- Improved trading partner relationships, and happier internal and external customers
- Lower business risk through consistent SLA, standard security practices and DRP

BES B2B Framework – A Multi-Enterprise Collaboration Service

Key partners

Meade Willis – www.meadewillis.com

- Meade Willis, a global B2B e-commerce and systems integration company, specializes in Supply Chain Solutions, SaaS, EDI, Outsourcing, and end-to-end process automation. Fully cloud based for over 15 years, the Meade Willis service platform delivers functionality and reliability, seamlessly integrating with any existing solutions and workflows.

SEEBURGER – www.seeburger.com

- Seeburger offers a comprehensive Business Integration Suite that functions as a central platform and data hub for all business processes with external business partners. This solution supports all communication channels with business partners, including EDI, paper, fax or the Web. It converts the data into the required formats, controls processes in accordance with configurable rules, interlinks all the major ERP systems and monitors the processes.

Techdynamics – www.techdynamics.com

- Techdynamics Solutions Inc. is a full-service consultancy firm that is focused on the technology of Electronic Customer and Vendor Connection for Consumer Products, for both Industrial and Retail Companies. It effectively and strategically supports the electronic relationships between customers and vendors.

Mphasis – www.mphasis.com

- Mphasis supports G1000 companies around the world in the improvement of their business processes.

Key roles

Chief Information Officer

Deliver the right information at the right time to support the right business outcome; responsible for information technology and computer systems

Operations Manager

Influencer tasked with improving processes and training while facing resource constraints

Side-by-side Comparison

Competitor	Company-level comparison		Offering-level comparison	
(Geography)	Biggest threat to DXC	DXC's position against them	Delivery model	Pricing model
OpenText GXS (Worldwide)	OpenText GXS is well-known; ranked #1 by Gartner in Integration Brokerage (Global) Vendor Market Share. They focus solely on B2B e-commerce services and have a large presence in Asia Pacific.	BES does not charge trading partners. We have the latest refreshed technology, updated software, and superlative service delivery. We are not tied to specific software, always use best-of-breed. Our pricing is not complex.	Managed service or on premises	Varies by deal size
IBM (Worldwide)	IBM has strong brand recognition. In 2010, IBM acquired Sterling Commerce that developed best-of-breed EDI software.	IBM's Sterling EDI software is good—we use it—but it is not ready to run right out of the box. BES invested millions over three years to make our Sterling solution (GSP) better and leverageable but BES is not tied to any specific software	Managed service or on premises	Varies by deal size
Axway (Worldwide)	Axway provides an "in house" solution to clients, where we offer a managed service. Axway serves more than 11,000 organizations in more than 100 countries. They formed an alliance with Wipro to provide a SaaS B2Bi offering.	BES does not charge trading partners. We have the latest technology, updated software, and superlative service delivery. Our pricing is not complex. BES offers a complete managed service.	On premises	Varies by deal size
Infosys and Wipro (Worldwide)	Infosys and Wipro compete aggressively against BES.	Our offshore engineers are more skilled and have more experience.	Managed service	Varies by deal size

Industries

Industry #1:

Industry name: **Retail / Consumer Packaged Goods (CPG)**

Trends

- Transparency and Sustainability
- Digital Consumerism
- Growth in home-delivery
- Multi-channel strategies

Hot opportunity areas

- Shopping with Augmented Reality (AR) to bridge the gap between the digital and the physical
- Product Customization
- Social Media Shopping
- Automated Delivery Strategies are Turning Stores into Warehouses

Client case study

Avery Products Corporation is a global manufacturer of office products such as binders, file labels and name badges selling directly to retailers and via internet to end customers.

Client Challenges:

- **Aging EDI environment** – required investment in platform and software. Outages were happening frequently and causing business impact (missed transactions).
- **Costly Support** – system required resources skilled in EDI, mapping, communications, testing and troubleshooting.
- **Growth** – Trading Partners were requesting EDI compliance and EDI was expected to grow 200% within the next two years.
- **Expanding Capabilities** – Trading Partners were requiring new technologies such as XML translation, flat-to-flat translation and non-VAN communications which required custom connectivity protocols and interaction models.

Client Outcome:

- **Cost Reduction** – After migrating to the B2B Outsourcing solution, the client’s overall costs dropped by 44%.
- **Smooth migration** – Leveraging BES’ proven methodology, project management and B2B skilled resources, the company experienced a smooth transition to the new environment without any business impact. The client was able to meet new requests from Trading Partners because they had access to the large pool of BES skilled resources.
- **Consistency and flexibility** – The client gained consistency in service levels and security, as well as improved capabilities and flexibility to support changing business needs.

Industry #2:

Industry name: **Manufacturing**

Trends

- Smart factories that rely on connected devices to leverage technologies like automation, artificial intelligence, IoT and more.
- Wearable Technology devices with different sensors that can be used by manufacturer’s workforce.

- Predictive Equipment Maintenance
- Distributed Manufacturing

Hot opportunity areas

- Virtual Reality and Augmented Reality
- Machine Learning and Artificial Intelligence (AI)
- Cybersecurity

Client case study

General Motors (GM) is the 2nd largest global automotive manufacturer with operations in 150+ countries.

Client Challenges:

- The client needed to process large numbers of file transfers between manufacturing plants, parts suppliers, vendors and dealerships to support their world-wide just-in-time order, fulfillment and delivery cycle. They also required guaranteed and protected integrity, security and delivery of critical financial data.

Client Outcome:

- By utilizing the BES MFT managed service offering from DXC, the customer is free from concerns related to on time delivery of critical EDI transmissions or timely set up of new trading partners. The DXC Service desk monitors the environment and handles issues without interrupting the customer from their primary jobs. A dedicated DXC support staff ensures that reliable service levels are maintained and continuous improvement remains a focus.

Industry #3:

Industry name: **Travel & Transportation**

Trends

- Data Analytics
- Electric Truck Fleets
- Influence of E-commerce

Hot opportunity areas

- Smart Technology in trucks
- Cybersecurity
- Artificial Intelligence in Logistics

Client case study

GEFCO is one of Europe's leading logistics groups and one of the top ten in the worldwide logistics industry. It provides logistics and supply chain management for original equipment makers (OEMs), as well as overland transport, sea and air transport, vehicle distribution, containers management and customs services. It has 400 locations in Europe, South America and Asia.

Client Challenges:

- Improve communication and data exchange with network of 20,000 trading partners
- Achieve financial savings
- Gain improved flexibility in customer and supplier business-to-business (B2B) connectivity
- Gain agility to enter new markets or withdraw from existing markets
- Achieve allocation of costs to different trading partners
- Update aging, inadequate EDI system to compete in fast-changing automotive logistics market

Client Outcome:

- Achieved ROI in 12 months; 40% savings from previous environment
- Simplified financial approach using service catalog units
- Improved billing by separation of fixed parts of invoices from the variable
- Enabled real-time monitoring of data flows

More good stuff

True DXC successes

"Thank you for the support you provide to Duracell. Your hard work and customer focused delivery is why Duracell extended this work with DXC. Please keep up the good work!"

- Tom Dalton, Applications Delivery Executive, DXC Technology

"You Guys are AWESOME!!! The speed at which you responded and the accuracy of the information provided was VERY impressive!! You are just about as good as it gets!! You practically did the trouble shooting on their system for them."

- David Beltz, Business Analyst, North Star Bluescope Steel

"BES MFT selected for renewal because of proven history – providing a high level of support across all GM units." A long time user of the of the MFT service, the GM customer views this offering as a "Cadillac" service in the managed file transfer space.

"BES successfully migrated 300 mappings, 4,000+ physical connections, 14,000+ trading partner relationships and completed 3,000+ service

requests. The BES EMEA platform is now processing many tens of millions of supply chain transactions each month for GEFCO one of the largest logistics supply chain companies in Europe.”

Next Steps

Business Exchange Services utilizes all available resources to qualify and assess deals that are in our pipeline. Our primary goal is to have a comprehensive understanding of the client’s current environment as well as their short term and long-term goals and objectives. Access to accurate information significantly enhances our understanding of the client’s needs and our ability to respond.

Review our more detailed BES sales/marketing content including At-a-Glance, fact sheets on services and client profiles on the BES What We Sell page.

- Contact BES at bes-sales-support@dxc.com or reach out to the key contacts listed on the BES What We Sell page
- Ask any questions about our services
- Explain your client’s needs and pain points
- Present your ideas on how you think BES could help your client
- Meet with BES and receive an offering overview presentation and/or a targeted presentation about specific services

If account interest remains, discuss a sales strategy approach with BES for your client. Our DXC Business Exchange Services consultants are available for:

- Conversations
- Presentations
- A demo, and/or
- An EDI / B2B assessment with clients
- A yellow pad cost estimate for the discussed solutions/services

Client benefits:

DXC BES streamlines transaction processing for clients who can capitalize on competitively priced services tailored to their specific needs providing these advantages:

- Low capital investment
- Straightforward, usage-based pricing— pay a single fee per transaction (*Subscription-based or fixed-fee pricing also available*)
- Volume discounts offered
- Predictable, transparent charges
- Rapid implementation/migration
- Scalability to accommodate growth
- Disaster recovery

Initiate follow-on actions:

If there is continued interest from the account and client, request from BES:

- a detailed assessment and a detailed cost model (BES will do an internal review of the cost model)
- The answers to these questions will be evaluated by the BES leadership team, and a response given as to whether further pursuit from a BES standpoint is recommended, based on initial data.
- BES will create a proposal summary and present it to the Account
- Account to present a DXC approved proposal to the client
- If client accepts, finalize Statement of Work and Service Level Agreement

Industry applications

Outsourcing the management of business transactions to DXC BES lets clients focus on core activities instead of spending time and money on technical issues. DXC BES’ Managed Service improves trading partner relationships, optimizes cash flow, increases transaction accuracy, ensures timely transaction delivery, enhances flexibility and ensures industry compliance.

BES provides a suite of offerings that address industry e-commerce needs that can be matched and scaled, including connectivity via value-added networks, Internet, telephone networks, and other communications, translation (standard and proprietary formats), media conversion (between ASCII and fax/paper), extended archiving, trading community management and trading partner supply chain software and services.

List of industries:

- Banking and Financial Services
- Energy
- Government
- Manufacturing
- Retail and Consumer Packaged Goods
- Travel and Transportation

If a client has a business domain challenge not specifically addressed by one of the industries above, then this offering can still be leveraged as the core and combined with a custom use case solution.
