

BES SEEBURGER COE

Experience, Capabilities,
Offerings

BES SEEBURGER COE – At a Glance

Who we are

Experienced global team:
More than 20 years of B2B&EDI
experience and more than 15 years of
SEEBURGER experience on average

Deep expertise – from Platform and
Infrastructure to Mapping, Business
Analysis and Operations

Integrated into DXC BES – access to
>200 Global B2B Professionals

What we do

- We have a strong IT Background – we ran our own Integration environments for HP, HPE and Compaq
- Serving large and small corporate clients worldwide – with operations, consulting and project implementations
- Run the full solutioning stack – from Platform setup and Application build to B2B process design and implementation
- Have built, modernized and migrated EDI and B2B Environments for more than 20 years
- Implement Best Practices and are well versed in topics around Audit and SOX compliance as well as Data Security
- Manage and run operations of all sizes and complexities – including delivery from cost-competitive locations
- We are running DXC's own EDI and B2B Solutions with the offerings, processes and knowledge we bring to our clients

Hosting Approaches

On-Premise

Building SEEBURGER solutions on-site on existing infrastructure - for maximum control

DXC VPC

Hosting SEEBURGER Solutions in the DXC Virtual Private Cloud – Let us take care of the Infrastructure

Public Cloud

Leveraging existing partnerships with AWS, Azure etc. - for maximum flexibility

Flexibly Managed

We can operate as much of your environment as required – from fully managed to client operated

Solutioning Approaches

Enterprise Gateway

We have built and run some of the largest EDI Gateways worldwide

Specialized Solutions

We can tailor industry or use-case-specific Solutions

MFT

Managed File Transfer Solutions for your use-case

SME

Need a small but solid EDI or B2B solution? We have options
