environment cost-
efficiently and with
highest quality

Key Differentiators And Value Proposition

- We have a global team with 20+ years of EDI/B2B and 15+ years experience on SEEBURGER products
- In close partnership with SEEBURGER, we modernize your Integration environment, using state-of-the-art technologies and tools
- We adjust to your hosting and operations preferences. From on-premise to public cloud, from managed service to self-supported
- As part of the DXC Business Exchange Services (BES) organization, we have access to 200+ further integration experts across the globe
- We have the experience and tools to guide you and your trading partners through this migration, utilizing self-service and other proven migration techniques
- Security, High Availability and DR are at the center of our solutions
- We run DXC's own EDI and MFT environments with the same products and expertise as we use with our clients
- We implement proven best-practices and processes to improve compliance and long-term supportability
- We have the expertise and experience in managing operations to provide the highest quality of support for your environment
