

Optimize global B2B exchanges and stay connected

DXC Business Exchange Services

Do you need better B2B—all around the world? DXC knows how to achieve it. Our single interface eliminates problems inherent in multiple systems across different partner.

Insights

- There's another way to connect business partners beyond traditional electronic data interchange (EDI).
- DXC Technology can help you better manage your business-to-business trading community through a single interface.
- Fortune 500 companies, such as Gates Rubber Company, benefit from our global B2B expertise.

DXC Technology delivers proven B2B e-commerce connectivity, integration, and process management solutions. We help you manage the flow of information, data translations, and collaborative processes with your entire global trading partner community.

Many companies that conduct business via traditional EDI struggle to connect with their trading partners. The community often uses a variety of nonintegrated EDI platforms and networks, resulting in costly, slow, and risky information transfers.

Noncompliant transactions—brought on by changing legislation and industry standards—only make matters worse. The situation is unmanageable, characterized by redundant and error-ridden data, inconsistent service levels, and limited visibility into business process performance. Even worse, the ensuing chaos can lead to loss of customers.

Gain the advantages of a single interface

DXC Technology creates and supports a single interface that eliminates mistakes inherent in dealing with multiple systems across various business partners. We focus not only on the technology platform but also on process quality and community penetration. This end-to-end optimization approach, which is unique in the marketplace, helps you achieve and maintain agile, effective B2B operations. With more than two decades of experience integrating EDI and trading communities across all industries, our managed solutions deliver unmatched value and service excellence.

Operate in an efficient, reliable, and secure environment

- DXC Technology works with you to assess your global B2B situation.
- We draw up a rationalization and modernization roadmap to give you an up-to-date, manageable, and cost-effective solution that minimizes complexity.
- We manage your B2B trading community, translate your documents, apply industry-specific editing, assess data quality, and validate business processes.
- You get a reliable, scalable, secure, managed environment that accommodates any process, standard, or format.
- Dedicated hosting arrangements are also available.
- Located on three continents, our processing centers provide unsurpassed uptime, consistent service levels, security, and tracking across all your B2B activities.

Streamline processes, reduce costs, and gain security

- Get efficient, cost-effective, secure communications via value-added networks (VANs), clearinghouses, the Internet, BBS, AS2, and other methods.
- Minimize risk and costs by exchanging any business information in any format, including EDI, HTML, XML, SAP IDOC, CSV, email, fax, Microsoft Excel, and formatted flat file.
- Reduce translation costs by 15% to 25% and VAN charges by 25% to 50%.
- Cut processing errors and increase data accuracy.

- Adhere to industry standards for data exchange through document-level validation, editing, and processing.
- Reduce or eliminate the need for specialize, in-house maintenance staff.

Connect, monitor, translate, and manage

- Secure, reliable connectivity—links partners via VANs, the Internet, clearinghouses, virtual private networks (VPNs), and other methods in a batch or real-time mode
- Document translation—transforms one electronic document format to another
- Business process management—optimally manages business processes end to end, including validations (supports HIPAA), edits, and exceptions
- Process monitoring—provides system alerts and remediation workflow when transactions fail pre-established business rules

DXC Technology delivers business continuity, efficiency, and security

- DXC Technology has more than 25 years of EDI and trading community integration experience.
- DXC Technology connects more than 130,000 trading partners spanning all industries and global regions.
- We annually process well over 3 billion documents on behalf of 1,750 clients in 20 plus countries.
- Our processing centers provide unsurpassed business continuity safeguards, including redundancy, failover, and high availability.
- Our breadth of services and depth of experience in technology are

unparalleled — extending to healthcare, consumer industries and retail, transportation, government, financial, and manufacturing industries.

- DXC Technology Business Exchange Services is certified by Drummond for AS2 interoperability.

Streamlined business processes

Gates Rubber Company, the world's largest non-tire rubber manufacturer, needed fast, easy EDI connections to modernize processes, handle multiple standards, and reduce expenses. That's when Gates turned to DXC Technology. The single-platform business exchange solution enabled the seamless flow of information and payments. Regardless of the communications channel or information format, neither the trading partner nor Gates had to install complex or expensive EDI equipment. And the DXC Technology-established help desk services as an initial contact point for operational issues. Errors are now tracked quickly and solved efficiently.

Gates reduced manual processes and established new e-communications connections more easily, expediting the incorporation of new trading partners. These realized efficiencies enabled Gates to refocus resources on new, mission-critical projects rather than IT.
